

FEATURES

- Simple to use and economical to operate
- Automatic dv/dt charge termination
- Equalize capability
- Ferroresonant Transformers
- Designed for single shift light duty
- Battery powered equipment
 - Walkies
 - Forklifts
 - Sweepers
 - Scrubbers
 - Scissorlifts

INDUSTRIAL BATTERY CHARGER

SINGLE SHIFT SERVICE

APPLICATION

Designed for single shift light duty with available recharge times greater than 8 hours.

SIMPLICITY

- Auto start/stop
- Starts automatically after connecting charger to battery. No timers to set.
- Charger automatically stops after battery receives proper charge.

RELIABILITY

- Failsafe protection
- Internal backup timer terminates charge cycle in the event of abnormal conditions
- AC interrupt protection. Charger automatically restarts upon resumption of AC power

TECHNOLOGY

Ferroresonant charger that automatically adjusts output current in proportion to battery voltage. Your batteries receive the correct amount of charge for optimum performance and maximum battery life.
